PORTFOLIO OVERVIEW

From Marketplace Theory to Client-Ready Strategy

These four exercises build a practical foundation in e-commerce management — starting with recognizing and classifying online business models, moving into real competitive ad research, then into marketplace fulfillment operations, and finishing with a client-facing platform recommendation and freelance proposal. Together they mirror the real workflow of evaluating, positioning and winning an e-commerce project.

1
Identify & Classify

2
Research Competitor Ads

3
Study Fulfillment Ops

4
Recommend & Propose

PROJECT 01

E-Commerce Site & Business-Model ID

Classified 12 real websites as e-commerce or not, mapped 10 sites to B2C/B2B/C2B models, sorted marketplaces vs. individual sellers, and sourced examples for services, physical goods and digital goods.

PROJECT 02

Facebook Ads Library Competitive Research

Located active ads from four business pages, isolated four individual “Shop Now” ads, and found four ads running across multiple platforms — building a repeatable competitor ad-research process.

PROJECT 03

Daraz Fulfillment (FBD) Analysis

Researched Fulfillment by Daraz benefits, sourced 4 real local FBD sellers with storefront evidence, compared FBD vs. non-FBD sellers, and explained inbound/outbound order flows.

PROJECT 04

Platform Strategy & Freelance Proposal

Compared WordPress, WooCommerce and Shopify for a real Upwork-style client scenario, then wrote a client-ready proposal, project objectives and a complete delivery strategy.

Project Strategy

E-Commerce Site & Business-Model Identification

Hands-on Exercise No. 1 — E-Commerce Management

Objective: Build the foundational skill of recognizing e-commerce websites at a glance and correctly classifying their business model — essential before analyzing or advising on any online store.

E-commerce Identification

B2C / B2B / C2B

Marketplace vs. Individual

Digital vs. Physical Goods

- ✓ Reviewed 12 live websites and correctly flagged each as e-commerce or non-e-commerce
- ✓ Classified 10 e-commerce sites into B2C, B2B or C2B business models
- ✓ Determined whether each site operates as a marketplace or an individual seller
- ✓ Sourced real URLs representing service-based, physical-goods and digital-goods e-commerce

Website	E-Commerce?
daraz.pk	Yes
zameen.com	No
canva.com	No
aliexpress.com	Yes
alibaba.com	Yes
misabargains.co.uk	Yes
youtube.com	No
limelight.pk	Yes
ebay.com	Yes
themeforest.net	Yes
bookme.pk	Yes
whatmobile.com.pk	No

Website	Business Type
daraz.pk	B2C
zameen.com	B2C, C2B, B2B
aliexpress.com	B2C
fiverr.com	C2B
amazon.com	B2C
linkedin.com	B2B
upwork.com	C2B

Type	Website URL
Selling Services	shopify.com
Selling Physical Goods	limelight.pk
Selling Digital Goods	themeforest.net

Facebook Ads Library Competitive Research

Hands-on Exercise No. 2 — E-Commerce Management

Objective: Use the Facebook Ads Library to locate real active ads from e-commerce and e-learning brands, then analyze ad formats, offers and cross-platform reach to inform future ad strategy.

Facebook Ads Library

Competitor Analysis

Shop Now Ads

Multi-Platform Campaigns

- ✓ Found 4 Facebook business pages running active ads: Daraz Online Shopping, Sapphire, Udemy, Virtual University of Pakistan
- ✓ Captured 4 individual “Shop Now” active ads from Limelight and Sapphire storefronts
- ✓ Identified 4 active ads running simultaneously across Facebook, Instagram and Messenger (Zameen.com, TemplateMonster)
- ✓ Synthesized findings into applied learnings on ad formats and competitive ad strategy

Solution:

Active ads: Daraz Online Shopping & Sapphire

“Shop Now” ads: Limelight & Sapphire

Daraz Fulfillment (FBD) Analysis

Hands-on Exercise No. 3 — E-Commerce Management

Objective: Understand Daraz's Fulfilled-by-Daraz (FBD) program from a seller's perspective — its benefits, trade-offs versus self-fulfillment, and the inbound/outbound order mechanics behind it — backed by real seller examples.

Daraz Seller Center

FBD Program

Marketplace Fulfillment

Inbound/Outbound Orders

- ✓ Researched and summarized 7 key benefits of the Fulfilled by Daraz (FBD) service
- ✓ Sourced 4 real local FBD sellers with storefront screenshots: Redragon, BuyToday, SpeedX, AIClean
- ✓ Compared FBD vs. non-FBD sellers across cost, control, delivery speed and visibility
- ✓ Explained inbound/outbound order flows and confirmed non-FBD sellers cannot access them

FBD sellers: Redragon & BuyToday storefronts

FBD sellers: SpeedX & AIClean storefronts

Platform Strategy & Freelance Client Proposal

Hands-on Exercise No. 4 — E-Commerce Management

Objective: Advise a real client scenario — a homemade skincare brand owner seeking an easy-to-use e-commerce platform — by comparing platforms, then converting that analysis into a client-ready freelance proposal and delivery strategy.

WordPress / WooCommerce / Shopify

Client Scenario Analysis

Freelance Proposal Writing

Project Strategy

- ✓ Compared WordPress, WooCommerce and Shopify across script type, ease of use, customization, security, scalability and cost
- ✓ Recommended Shopify for the client's limited-technical-skill scenario and justified the choice in writing
- ✓ Wrote a complete, client-ready freelance proposal for the Upwork-style project brief
- ✓ Defined 7 measurable project objectives and a full delivery strategy (setup, SEO, marketing, scaling, support)

Feature	WordPress	WooCommerce	Shopify
Type of Script	CMS	Plugin (WordPress)	E-Commerce platform
Ease of Use	Moderate	Beginner	User friendly
Customization	Highly customizable	Highly customizable	Customizable, some limits
Security	Depends on plugins/hosting	Good security measures	Secure, built-in features
Scalability	Scalable with setup	Scalable with extensions	Highly scalable
Cost	Free + hosting/domain	Free + hosting/domain	Subscription-based

Recommendation

Shopify was recommended: its all-in-one hosting and security, seamless scalability, and user-friendly interface best fit a founder with limited technical expertise — validated by the client reaching new customers and gaining positive feedback within her first month live.

LET'S WORK TOGETHER

From Marketplace Research to Client-Ready E-Commerce Strategy

This portfolio reflects hands-on, practical execution across e-commerce classification, competitive ad research, fulfillment operations and client platform strategy — the same structured approach applied to real client projects in AI automation, data analytics and digital marketing.
